

INVESTMENT STRATEGY

The Global Value Fund II – Currency Unhedged invests primarily in foreign equity securities that the Adviser believes are undervalued, but also invests on a more limited basis in U.S. equity securities when opportunities appear attractive. Investments by the Global Value Fund II are focused for the most part in developed countries with some exposure to emerging markets. Contrary to our other international mutual fund, the Global Value Fund, the Global Value Fund II – Currency Unhedged does not seek to reduce currency risk by hedging its perceived foreign currency exposure back into the U.S. dollar and will be exposed to currency fluctuations.

COMMITMENT OF THE ADVISER

As of December 31, 2017, the current Managing Directors and retired principals and their families, as well as employees of Tweedy, Browne, had more than \$1.2 billion in portfolios combined with or similar to client portfolios, including approximately \$6.4 million in the Global Value Fund II – Currency Unhedged. Our Managing Directors have been with the firm for tenures ranging from 25 to 42 years. No partner in the history of Tweedy, Browne has ever left the firm except for the reason of retirement.

Current and future portfolio holdings are subject to risk. Investing in foreign securities involves additional risks beyond the risks of investing in U.S. securities markets. These risks include currency fluctuations; political uncertainty; different accounting and financial standards; different regulatory environments; and different market and economic factors in various non-U.S. countries. In addition, the securities of small, less well known companies may be more volatile than those of larger companies. Value investing involves the risk that the market will not recognize a security's intrinsic value for a long time, or that a security thought to be undervalued may actually be appropriately priced when purchased. Diversification does not guarantee a profit and does not protect against a loss in a declining market. Please refer to the Fund’s prospectus for a description of risk factors associated with investments in securities which may be held by the Fund.

The performance shown, before and after taxes, represents past performance and is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted.

* The Fund's expense ratio has been restated to reflect decreases in the Fund's custody fees effective August 1, 2017. The Fund does not impose any front-end or deferred sales charges. However, a 2% redemption fee is imposed on redemption proceeds for redemptions or exchanges made less than 15 days after purchase. Performance data does not reflect the deduction of the redemption fee, and if reflected, the redemption fee would reduce any performance data quoted for periods of 14 days or less. The expense ratios shown above reflect the inclusion of acquired fund fees and expenses (i.e., the fees and expenses attributable to investing cash balances in money market funds) and may differ from those shown in the Fund's financial statements.

The Global Value Fund II – Currency Unhedged's performance data shown would have been lower had certain fees and expenses not been waived and/or reimbursed from October 26, 2009 through December 31, 2014.

Index Description

1. The **MSCI EAFE Index** is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The **MSCI EAFE Index (in US\$)** reflects the return of the MSCI EAFE Index for a U.S. dollar investor. Results for each index are inclusive of dividends and net of foreign withholding taxes.

Indexes are unmanaged, and the figures for the indexes shown include reinvestment of dividends and capital gains distributions and do not reflect any fees or expenses. Investors cannot invest directly in an index.
